Please review unusually high water bill (customer no. 8842719)

Dear Sir or Madam,

I am writing regarding my latest water bill for May 2026, which appears unusually high compared to previous months.

The billed consumption is listed as 58 m³, while my household has typically used between 11 and 14 m³ per month over the past year. There have been no changes in occupancy or usage behavior at my address.

To help clarify this, I checked all visible pipes and fixtures in my apartment and did not notice any obvious leak. I would therefore kindly ask you to review the meter reading and billing calculation for this period.

If needed, I can provide photos of the current meter reading and copies of my recent bills for comparison. If an on-site inspection is required, I am available on weekdays after 16:00.

Thank you very much for your support and for a short written confirmation once the review has been completed.

Mit freundlichen Grüßen

Jonas Hartwig
